.....
>>>>>
Hi Dante,

I had begun revisions to the slide show, and will incorporate your work into the revised version. I will finish up our combined version on Monday, review with Jeff before the end of the day, then submit to CBI to start formatting/cleaning up.

One change I will suggest is that the footer be changed from EPA to NDEP since we are giving the presentation.

I don't know how you think about that; it would be possible to include both EPA and NDEP in the footer, but I would probably not be in favor of that, or with including BLM in the footer. Each of our logos are already present on every slide, and BLM does not have much to do with creating, or even revising the presentation.

I have a feeling that once I share this with EPA and BLM management teams during the dry run meeting they might have heartburn with it, and I will have to change it, and probably other revisions they request as well.

I wish there was a better way to get feedback prior to that dry run meeting, because I will be scrambling to incorporate changes to the presentation in the 1/2 hour between the dry run meeting and needing to leave for Yerington. Maybe we can share the slides with everyone on late Thursday, 12/8, and get feedback in advance.

That still doesn't give me much time, but I would potentially have 1 hour Monday morning to make changes before the dry run meeting starts.

We can chat about this on Monday, and decide the best path forward.

Talk to you then.

Jeryl,

Attached are my proposed changes to the slides. The slides I did not edit can be assumed to be

fine. My edited slides did not necessarily pick up the correct formatting; it should be assumed that CBI will need to incorporate my edits into their slides with the proper formatting, background, etc.

I did not have time to make slides for the Evaluation of Alternatives section, but I created a table in Word that starts to lay out my vision for how the discussion could be structured. We will need to work with CBI some more on this part next week. Basically, I extracted key concepts from the PP and put them in a table format so that one can compare the alternative fairly easily. Needs some work. If you can add in the final column this weekend, that would be great! I can talk with CBI Monday about ways to incorporate the concepts from the table into the slide presentation. Thanks for you help!

Subject: OU8 Proposed Plan Draft Posterboard Text and PPT Presentation for your review and comment

All,

Please find the attached Posterboards text/graphics and PPT for your review and comment.

A few things to note:

∇ We recommend the poster size to be 30x40. If you have another size in mind, please communicate that immediately as we are starting on a template.

∇ For the Welcome Poster (in terms of minimizing the cost) we recommend one of the following three options. 1) revise language to make it more general so it can be reused at other Anaconda meetings 2) create a table top version to sit at the sign in table 3) eliminate it all together. The 4th option is to just keep it the same size at the others.

∇ We are going to make the concrete basin and E-cell graphics look and feel like the HLP Cap

graphics.

∇ We will be adding the Alternative 1 components to the OU8 features PDF.

∇ Does anyone have a timeline of events/construction activities we can insert on the Alternative 4 poster? I think this could be a good visual on the posterboard.

Due to the upcoming Holidays we have tight review deadlines. We ask that you review and provide comments as follows

Posterboard Comments (text version) Due: Nov 22 at noon (please provide in track changes).

We will start laying out the posterboards and send out for rolling review beginning Nov 28 (or earlier if possible).

Comments on poster layouts due Nov 30.

We will send PDFs for final approval on Dec 2.

Sending to the printer on Dec 5.

The PPT does not require immediate review and comment, but please forward your comments to me by December 2. Layout is a little clunky on some slides, I'll work on this after content is close to final. Please note that the 4 alternative slides will be populated after the poster text is finalized. I recommend the language to be similar between the two deliverables.

Thank You,

Shelley
